Labeler Neri Marchesini model RL 500

Application of 1 label on the lateral surface of ampoules, vials or cylinder shaped containers glass, plastic, metal.

Special features:

Automatic size change by means of servomotors that adjust the distance of the feeding belt from the metering screw, the opening of the transport star wheel rollers, the position of the overprint unit with respect to the label to be processed.

The RL is a high speed labelling machine with a star wheel transport system and has been designed to reduce manual operations and size change times to a minimum.

This is made possible by a variable pitch transport star wheel, which can handle a vast variety of ampoules and vials within its adjustment range.

The RL can work in-line with other packaging machines or out-of-line with a tray infeed and outfeed arrangement.

Year: 2005.

Label height 10 - 60 mm.

Maximum rate 500 per minute label speed 0 - 60 mt/1' Maximum reel diameter 400 mm.

Electric power supply 380-220V 50Hz.

Installed power 4,5 kW.

Compressed air 7 bar.

Compressed air consumption 20Nlt/h.

Allen printing station, camera control for printing, missing label rejection unit.
