### Product details

<b>Category:</b>	Sold
<b>Machine:</b>	150
<b>Machine code:</b>	IT190
<b>Manufacturer:</b>	Accela Cota
<b>Year of construction:</b>	n/a

### Description

---

The Accelacota 150 models have been BWI Manesty's most successful range of coating systems. Noted for their ability to deliver fast, flexible and consistent performance across a wide variety of products, the Accelacota range boasts thousands of satisfied customers worldwide, all paying testimony to the system's abilities.

For medium to large scale production, the Accelacota range features a unique side vented pan, with patented baffles, a choice of film application system.

The Accelacota 150 incorporating tubular baffles, provides efficient production of normal batch sizes

Advanced Specifications flow tab system :

A key feature of the Flowtab system is the unique spraygun, designed by BWI Manesty to improve coating efficiency, reduce operational downtime and simplify cleaning. The automatic clean-out facility prevents fluid blockages within the nozzle, even during extended production cycles.

Even at low atomising pressures, the spray rate and pump speed of the Flowtab can be controlled manually via the portable console or, automatically, from the ACS control console, without adjusting the sprayguns.

Pan working capacity: 150 Kg.

Pan speed: 5 - 15 RPM

Pan outside diameter: 48" (1219.2 mm)

Pan mouth diameter: 19" (482.6 mm)

Base construction: Stainless steel

Drive motor: 2 hp 1440 RPM

Height: 75" (1917.2 mm)

floor space: 61" x 50" (1548.9 x 1270 mm)

Weight: 1550 lb (700 Kg)
