---

Automatic rigid tubes filling and closing machine MT1000 MARCHESINI, suitable to count and introduce positively tablets in plastic or metallic rigid tubes, cylindrical-shape.

Final tube closure with pressure cap and discharge of the tubes correctly filled on a bucket conveyor at machine outfeed, with cap facing the operator side;

Extremely compact tube feeding;

Tube transport is carried out through bushes that proceed with synchro-dynamic movements;

The tablet insertion is made with a system that moves them in positive way by means of a pick&place system;

Machine is manufactured in strictly compliance with GMP norms;

Balcony type (cantilever);

Conceived to clearly separate the working area from the area containing mechanical transmissions and electrical equipments;

Made of steel and aluminium with AISI304 stainless steel panels. The machine operating parts are constructed with materials suitable to operate at direct contact with product;

Hours of operation: 207 hours.

**MECHANICAL SPEED:**

up to 1.000 tablets/minute

**SIZE DATA:**

Tubes Diameter: from 16 to 40 mm

Tubes Length: from 60 to 160 mm

Tablets Diameter: from 14 to 35 mm

Tablets Thickness: from 3 to 8 mm

Cap Diameter: from 18 to 44 mm

Cap collar Height: from 1 to 10 mm
