

Washing Machines for Ampoules and Vials/Blowing Table for Bottles BOSCH RRU 3043

Images

Product details

Category:	Sold
Machine:	RRU 3043
Machine code:	IT414
Manufacturer:	BOSCH
Year of construction:	1999

Description

Output : 200 vials per minute (mechanical speed)

The Bosch RRU series of washers and dryers performs ultrasonic cleaning for fast and precise removal of particulate material. The rotary design allows for a small footprint and ease of footprint and ease of operation with fast and accurate removal of particulate material and reliable feeding of small containers.

Bosch RRU rotary heads will give you excellent results with gentle handling of vials.

They can be configured for a wide range of formats.

Ideal rotary washer for cleaning vial bottles.

Exceptional accessibility

Processing ranges and capacities depend on individual containers, line integration etc. GMP-compliant construction; small footprint;

safe transport of containers; high level of ultrasonic cleaning; stations for internal and external container washing

stations; with pumping station; quick format changeover.

TECHNICAL SPECIFICATIONS

Length 2240 mm Width mm 2130 Height 1700 mm

Net weight Kg 2000

Maximum container diameter 52 mm

Maximum container height 128 mm

Maximum output 12000 / hour (mechanical speed)
