Capsule Fille Sejon Vantix F50

The Capsule Filler can fill various powder, pellet, tablets into capsules while filling various capsules such as pellet powder capsules, and tablet powder capsules. It is operated and controlled via a 15 inch large touch screen mounted on the operation panel. Able to adjust the thickness of pellet blocks so that it allows accurate measuring of drug weight that is inserted into the capsule. Also, as it is designed in a simple structure for easy disassembly and assembly of the pellet blocks, it will significantly reduce the setting time.
