Product details

Category:	Washing Machines for Ampoules and Vials/Blowing Table for Bottles
Machine:	MRW800
Machine code:	IT497
Manufacturer:	Rotary
Year of construction:	n/a

Description

Rotary Vial Washer MRW800. operates with a single-phase 220 volt AC outlet with ground and requires 60-80 psi of air pressure. The machine is controlled by an Allen Bradley SLC5/05 programmable logic controller (PLC) and will handle glass vials with speeds of 50-200 containers per minute. Due to its rotary design, the Mengibar washer simultaneously loads, washes, removes excess water, and discharges the vials. Six working stations offer internal and/or external cleaning using virgin WFI and sterile air. The WFI travel path has a minimum slope of 1/8" per foot and contains no dead legs. so the entire piping system is self-draining.
