Product details

Category:	Capping and Closing Machines
Machine:	F550 / C
Machine code:	20C15
Manufacturer:	IMA Farmomac
Year of construction:	n/a

Description

INTIMAC S.R.L.

Via XXV Aprile, 8
21054 Fagnano Olona (VA) - Italia
Tel. +39 0331 1693557
email: inti@intisrl.it

The F550 (Serial no. 550009 ?) is an 8-head rotary seamer for automatic feeding and seaming of aluminium or flip-off capsules. The machine has been designed to work with previously filled vials and allows the application of aluminium or flip-off caps; it is also designed for in-line connection both upstream and downstream. The vials arrive at the machine via a special feeder. The vials come from the infeed belt and are closed by the rotary head. Once operations have been completed, the vials exit onto the outfeed belt or are rejected from the belt.

TECHNICAL DATA

vial dimensions

- diameter: min. 14 mm - max. 60 mm

- Height: min. 5 mm - max. 100 mm

production: 16000 vials per hour

Installed power: 3,5 KW
