22F119 tipo LAC-3 Matr. MI.RA06011  
NERI (MARCHESINI) VIAL WASHER 2009

The LAC group machines have the function of internally and externally washing vials with the following characteristics:

**TECHNICAL DATA**

Minimum diameter 10 mm

maximum diameter 68 mm

Minimum height 50 mm

Maximum height 180 mm

Minimum diameter of the inner mouth of the vial 5 mm

Maximum diameter of the mouth of the vial 36 mm

The machine is composed of a AISI 304 stainless steel structure, with plexiglass and tempered glass protections.

All panels are satin AISI 304.

The transport of the vials to the different washing stations comes by means of clamps in AISI 316

The distribution, filtration and heating system of the washing liquids are made entirely of stainless steel. The same for the collection container for fluids that are extrapolated from the structure itself, to facilitate cleaning.

The recirculation container has a capacity of approx 40 liters.

The heating elements in the recirculation vessel are of the type:

Heating Italian for water 255/400 V 60 Hz Three-phase 2000W

The springs installed in the clamps that hold the vials have the following characteristics
