Product details

Category:	Cartoning Machines/Case packers
Machine:	
Machine code:	22F310
Manufacturer:	PROMATIC
Year of construction:	1999

Description

Promatic Packaging Machine – Model Bipak

The Promatic Bipak vertical cartoning machine is versatile, flexible and reliable. Depending on the production needs or the application, the machine can be used in continuous or intermittent mode by means of a simple selection on the control panel. The standard Bipak model is suitable for manual feeding. It can be equipped with a wide range of automatic feeding units to transform it into a fully automatic cartoning machine capable of producing up to 110 cartons/minute. The automatic feeding of products through the continuous motion pick & place unit (speed up to 100 products/minute) is designed to deliver high efficiency in volume production of upright products such as vials and jars. Ancillary devices such as product security systems are easily accommodated. The Venturi vacuum unit minimizes noise levels in operations such as carton pick-up and opening or leaflet/booklet feeding.
