---

Marchesini Multipack box wrapping machine mod- FA10.5S.

Automatic intermittent motion machine designed according to cGMP standards for stretch wrapping. Designed mainly for the cosmetic and pharmaceutical markets, simplicity of design and high speed performance.

These are its main features.

General features:

Servo driven motor ensures reliability and synchronized motion even at high speeds Machine and motors managed by PC;

Balcony structure with clear division between the mechanical parts placed at the rear of the machine and the product at the front;

Ergonomic structure facilitates inspection of the machine and provides great visibility of the work;

Simple, linear construction for easy cleaning; Speeds, strokes and positions of the individual groups are set by PC, making correct machine set-up easy and automatic.
