Product details

Category:	Coating Equipment
Machine:	ACCELACOTA 350
Machine code:	23-875
Manufacturer:	Manesty
Year of construction:	n/a

Description

Manesty 350 Tablet Coater

With a fully perforated drum, and unique spray gun and mixing baffle technologies, fast and efficient coating of products using aqueous, organic solvent or sugar coating media is achieved.

The fully perforated side-vented coater drum and cabinet design allows highly effective drying capacity in the process without the need to use high drying temperatures eliminating lower process efficiencies (spray drying) and detrimental thermal stresses on the product.

Accelacota 350 is quickly available to coat the next batch of tablets.

Tablets are loaded using a simple chute and unloaded by reversing the direction of the drum for fast and gentle removal.

? Suitable for large scale production

? Standard drum capacity 450 litres

Key Benefits

- Low capital investment
- Reduced cost of ownership
- Unique mixing baffle designs
- Anti-bearding spray system
- Globally installed, proven technology
