Product details

Category:	Sold
Machine:	TLT 1400 S
Machine code:	23-931
Manufacturer:	BOSCH
Year of construction:	2004

Description

Blistering machine Bosch TLT 1400 Sdel 2004 for the packaging of pharmaceutical products in blister packs of medium output range.

The consistent separation of the production and drive zones as well as the complete encapsulation of the product feed zone ensure a pharmaceutically compliant process. No vapors or abrasion particles can get into the production zone, which means that the product and packaging material remain protected.

Extremely easy operator control

Color touchscreen with a Windows operator interface (icons) facilitate operator control of the machine and reduce erroneous use.

The software allows the integration of all languages.

The machine stations, vertically free-standing, can be cleaned easily and completely.

The TLT 1400 is ideally matched to cartoner CUT 120 (up to 120 cartons/min) and CTC (up to 370 cartons/min).

Technical data:

Output

1 or 2 lane max. 370 blisters/min

Web dimensions

Base web width max. 155 mm

Lidding material width max. 151 mm

Processing data

Size range 180 x 145 mm

Depth of Alu max. 8,5 mm

Depth of PVC/PP max. 12 mm

Speed of web travel max. 14 m/min

Forming cycles max. 100 1/min

Die-cutting cycles max. 370 1/min

Blister stacking height max. 100 mm

Stacking count max. 12 blisters

Product feed

inline, variofill, or without inserting wheel, brush feeder box, extension module for mounting additional product feed systems.

Foils/films

All standard thermoforming films and aluminum foils

Die-cutting size

1-lane max. 90 x 145 mm

min. 30 x 60 mm

2-lane max. 90 x 70 mm

min. 30 x 30 mm

General data

Weight : 3600 kg
