### Product details

<b>Category:</b>	Cartoning Machines/Case packers
<b>Machine:</b>	BA 100
<b>Machine code:</b>	23-1065
<b>Manufacturer:</b>	MARCHESINI GROUP
<b>Year of construction:</b>	1991

### Description

BA 100 series cartoning machines are horizontal reciprocating motion machines. The cartoning cycle is fully automatic. A sensor detects the presence of the product in the drawer and commands the picking of the carton and any prospectus, activating the correct picking controls. Carton opening is done with the traditional mechanical blade system that ensures proper operation with the widest type of cartons and carton quality. Size changeover requires simple and quick operations guided by millimeter scales.
